(2) Reason for the revision

In the full-year consolidated forecast for the fiscal year ending March 31, 2027, net sales, operating profit, ordinary profit and profit attributable to owners of parent are expected to exceed the previous forecast, mainly due to sales growth in the Optical Solutions business driven by increased demand for data center-related products, among other factors.

(Note) The above forecasts are based on information available as of the date of this announcement and assumptions as of the same date regarding uncertain factors that may affect the Company's future performance. Actual results may differ from these forecasts due to various factors.
